

Coextant Products

The biggest challenge for each portal or Web project is the integration, preparation, transport and presentation of content. Information has to be transferred efficiently and in media-specific formats from the place of origin to the place where it is needed. Our content automation products enable organisations to completely automate their information supply processes. We offer the following products for information flow optimization:

<p>MOSS WSS</p> 	<p>Enterprise Edition</p> 	<p>Solutions</p> 	<p>Publishing House</p> 
---	---	---	---
